

INSTANTLY SCALABLE INFRASTRUCTURE AS YOUR BUSINESS NEEDS IT

OryxCloud Infrastructure as a Service (IaaS) removes the on premise operational complexity of your entire IT infrastructure allowing of you to focus on growing your business. IT infrastructure is at its best when it's not seen, when it requires minimal management, when it's risks free, and when it can scales intelligently with your changing business needs.

TECHNOLOGY AT A GLANCE

OryxCloud IaaS represents a new consumption model for the use of IT resources. The model offers our client's internet bandwidth, storage and computing power on an elastic, on-demand basis, over the Internet.

The infrastructure is provisioned in the OryxAlign datacentres and billed on a pay-as-you-grow basis.

The biggest returns are delivered with OryxCloud IaaS. It preserves capital, enables IT staff to focus on innovation and growth, and improves alignment between IT and the business by providing an agile IT infrastructure that's scalable and available on demand.

OryxCloud IaaS delivers a highly flexible 'pay as you grow' model that accurately aligns spend with your evolving business needs, with zero upfront capital investment.

FLEXIBLE CAPACITY

OryxCloud IaaS can replace your existing on-premise infrastructure or be used to supplement or enhance it. Instantly scalable to adapt to the changing IT requirements of the business.

HIGH AVAILABILITY

99.95% guaranteed platform availability and enterprise-level benefits, such as redundancy across multiple datacentres.

INSTANT RETURN ON INVESTMENT

There is no capex required for deployment and very predictable monthly opex ensure you are only paying for what your business needs.

RAPID DEPLOYMENT

The infrastructure can be rapidly deployed and provisioned in less than half the time it would take to bring a traditional infrastructure online.

HIGHLY SECURE

Located and housed in state-of-the-art Tier 3 and ISO27001 accredited UK datacentres where security is paramount. Additional layered infrastructure security with dedicated firewalls and private VLAN's.

24x7x365 SUPPORT & MANAGEMENT

Committed and dedicated support, monitoring & management around the clock and on-premise. Guaranteed technology peace of mind
