

# how cyber secure is your business?

## get your cyber security score

Answer just 14 questions to get a % score on how protected your organisation is from cyber security threats. See your score at the bottom and if you're not comfortable with the result, call us or email [hello@oryxalign.com](mailto:hello@oryxalign.com).

### 1. security assessment

Have you conducted a full security assessment within the last six months?

YES ☐ NO ☐

It's important to establish a baseline and close existing vulnerabilities.

Have you resolved all the risks highlighted in the security assessment?

YES ☐ SOME ☐ NO ☐

### 2. security awareness

Do you train all your staff every quarter?

YES ☐ NO ☐

Regular training reduces the likelihood of a breach. Teach them about data security, email attacks, and your policies and procedures.

### 3. email security

Are you confident about your email security?

YES ☐ LITTLE ☐ NO ☐

Most attacks originate in email. We'll help you choose a service to reduce and protect against malicious emails.

### 4. standardise policies

Have you applied security policies on your network?

YES ☐ SOME ☐ NO ☐

Examples: Deny or limit USB file storage, enabled enhanced password policies, and limited user access. We offer web-based training and template security policies.

### 5. multi-factor authentication

Do you use Multi-Factor Authentication (MFA) whenever your staff login to internal and external sites?

YES ☐ NO ☐

It adds an additional layer of protection to ensure that your data stays protected even if your password gets stolen.

### 6. encryption

Do you encrypt files at rest and in motion?

YES ☐ NO ☐

Think email and especially on mobile devices.

### 7. web gateway security

Do you have cloud-based security that detects web and email threats as they emerge on the internet?

YES ☐ NO ☐

It blocks threats on your network within seconds - before they reach your staff.

### 8. firewall

Have you turned on Intrusion Detection and Intrusion Prevention features?

YES ☐ NO ☐

It sends log files to a managed SIEM (Security Information & Event Management).

Not sure about these things? Call us today.

### 9. advanced detection & response

Have you deployed Endpoint Detection & Response (EDR) or Extended Detection & Response (XDR)?

YES ☐ NO ☐

Today's technology replaces outdated anti-virus. It protects against sophisticated threats and can rollback an attack.

### 10. SIEM/log management

Do you have a managed SIEM, 24/7/365?

YES ☐ NO ☐

It uses big data to review all event and security logs from all covered devices to protect against advanced threats and to meet compliance requirements.

### 11. mobile device security

Have you enabled mobile device security?

YES ☐ NO ☐

Today's cybercriminals attempt to steal data or access your network via your employees' phones and tablets. It's a piece of the security puzzle that's often overlooked.

### 12. computer updates

Are your Microsoft, Adobe, Java and other products updated regularly?

YES ☐ NO ☐

We provide a 'critical update' service via automation to protect your computers from the latest known attacks.

### 13. backup

Do you backup locally or in the cloud and store offline?

YES ☐ NO ☐

Test your backups often. And if you're not convinced your backups are working properly, call us ASAP.

### 14. cyber insurance

Do you have cyber insurance?

YES ☐ NO ☐

If all else fails, protect your income and business with cyber damage and recovery insurance policies.
