get your cyber security score

Answer just **14 questions** to get a % score on how protected your organisation is from cyber security threats.
See your score on page 2 and if you aren't comfortable with the result, call us or email hello@oryxalign.com.

1. security assessment

Have you conducted a full security assessment within the last six months?
It's important to establish a baseline and close existing vulnerabilities.

YES   NO

Have you resolved all the risks highlighted in the security assessment?

YES   SOME   NO

2. security awareness

Do you train all your staff every quarter?
Regular training reduces the likelihood of a breach. Teach them about data security, email attacks, and your policies and procedures.

YES   NO

3. email security

Are you confident about your email security?
Most attacks originate in email. We'll help you choose a service to reduce and protect against malicious emails.

YES   LITTLE   NO

4. standardise policies

Have you applied security policies on your network?
Examples: Deny or limit USB file storage, enabled enhanced password policies, and limited user access.
We offer web-based training and template security policies.

YES   SOME   NO

5. multi-factor authentication

Do you use Multi-Factor Authentication (MFA) whenever you login to internal and external sites?
It adds an additional layer of protection to ensure that your data stays protected even if your password gets stolen.

YES   NO

6. encryption

Do you encrypt files at rest and in motion (think email and especially on mobile devices?)

YES   NO

7. web gateway security

Do you have cloud-based security that detects web and email threats as they emerge on the internet?
It blocks threats on your network within seconds - before they reach your staff.

YES   NO

8. firewall

Have you turned on Intrusion Detection and Intrusion Prevention features?
It sends log files to a managed SIEM (Security Information & Event Management). Not sure about these things? Call us today.

YES   NO

9. advanced detection & response

Have you deployed Endpoint Detection & Response (EDR) or Extended Detection & Response (XDR)?
Today's technology replaces outdated antivirus. It protects against sophisticated threats and can rollback an attack.

YES   NO

10. SIEM/log management

Do you have a managed SIEM, 24/7/365?
It uses big data to review all event and security logs from all covered devices to protect against advanced threats and to meet compliance requirements.

YES   NO

11. mobile device security

Have you enabled mobile device security?
Today's cybercriminals attempt to steal data or access your network via your employees' phones and tablets. It's a piece of the security puzzle that's often overlooked.

YES   NO

12. computer updates

Are your Microsoft, Adobe, Java and other products updated regularly?
We provide a 'critical update' service via automation to protect your computers from the latest known attacks.

YES   NO

13. backup

Do you backup locally or in the cloud and store offline?
Test your backups often. And if you're not convinced your backups are working properly, call us ASAP.

YES   NO

14. cyber insurance

Do you have cyber insurance?
If all else fails, protect your income and business with cyber damage and recovery insurance policies.

YES   NO
