

GAIN & MAINTAIN CONTROL OF 'BRING YOUR OWN DEVICES' FROM A SINGLE SCREEN

Nearly every organisation has to deal with mobile devices at a level that was unprecedented even two years ago. The array of choices of device, operating system, applications, and potential uses can be dizzying in their infinite scope. Whether the organisation needs the entire stack of device, content- and app-management capabilities, and containerisation, or just a few, an enterprise mobile strategy is needed.

TECHNOLOGY AT A GLANCE

OryxAlign's mobile device management is an easy-to-use cloud platform with all of the essential functionality for end-to-end management of today's mobile devices including iPhones, iPads, Androids, Kindle Fire devices, Windows Phones and BlackBerry smartphones. Devices are configured for enterprise use and corporate data on the devices is secured.

KEY BENEFITS

- Over-the-air (OTA) enrolment
- Passcode & encryption enforcement
- Device restriction settings
- Remote locate, lock & wipe (full & selective)
- Jailbreak & root detection
- Policy updates & changes
- Compliance reporting
- Corporate directory integration
- BYOD privacy settings
- Application management & distribution
- Secure document sharing
- Mobile expense management

OryxAlign partner with MaaS360 mobile device management (MDM) to deliver the fastest and most comprehensive way to configure devices for enterprise access and secure corporate data on smartphones and tablets — all from a single screen.

As a fully integrated cloud platform, MaaS360 simplifies MDM with rapid deployment, visibility and control that spans across mobile devices, applications and documents. Deployment is quick. In just a few clicks, IT administrators can start enrolling devices and immediately manage the entire mobile device lifecycle — from enrolment to enterprise integration, configuration and management, monitoring and security, support, and analytics and reporting. MaaS360 allows you to seamlessly apply enterprise-level policies to all devices to enable comprehensive mobile security (mSecurity), whether they are employee-owned or provided by the company, to optimize operational efficiencies, auditing and compliance

How OryxAlign & MaaS360 meet your MDM challenges

1. Increase security & compliance enforcement
2. Reduce the cost of supporting mobile assets
3. Enhance application & performance management
4. Ensure better business continuity
5. Increase productivity & employee satisfaction
6. Proven approach to cloud-based mobility management
7. Powerful management & security to address the full mobility lifecycle
8. Ensure patches and anti-virus signature files are always up to date on laptops
9. Push software to devices, regardless of their location
10. Seamlessly integrates with all of your existing infrastructure
11. Simple & fast with an exceptional customer experience.

MaaS360 also provides simplified IT management of your Windows laptops & OSX devices. Whether you're optimizing your existing laptop management strategy or considering total enterprise mobility management to include smartphones and tablets, the challenges are the same: dealing with constantly changing users, devices and applications; preventing security risks and illegal information access; aligning user expectations; and asset management.

ABOUT ORYXALIGN

OryxAlign is a thriving and vibrant managed technology services provider, with client happiness at the heart of our business. With decades of combined experience, we remove the stress and strains of IT by delivering efficient, practical and affordable managed technology services.

We work as your IT partner, not as an outsourced provider.

RAPIDLY ENROLL MOBILE DEVICES

MaaS360 mobile device management streamlines the platform set up and device enrolment process to make life simple for IT and employees.

- Select MDM services and configure device enrolment settings
- Send enrolment requests over-the-air (OTA) using SMS, email, or a custom URL
- Authenticate against Active Directory/LDAP, using a one-time passcode, or with SAML
- Create and distribute customized acceptable-use policies and EULAs
- Register corporate and employee owned (BYOD) devices
- Initiate individual or bulk device enrolments
- Apply or modify default device policy settings

INTEGRATE MOBILE DEVICES WITH ENTERPRISE SYSTEMS

Through the MaaS360 Cloud Extender, enterprise system integration is easy and straightforward, without the need for on-premises servers or network reconfigurations.

- Instant discovery of devices accessing enterprise systems
- Integrate with Microsoft Exchange, Lotus Notes, and Microsoft Office 365
- Leverage existing Active Directory/LDAP & Certificate Authorities
- Manage BlackBerry Enterprise Server (BES) policies
- Connect with other operational systems through robust web APIs

CENTRALLY MANAGE MOBILE DEVICES

MaaS360 provides a unified mobile device management console for smartphones and tablets with centralized policy and control across multiple platforms.

- Configure email, calendar, contacts, Wi-Fi and VPN profiles over-the-air (OTA)
- Approve or quarantine new mobile devices on the network
- Create custom groups for granular management
- Distribute and manage public and corporate applications
- Securely share and update documents and content
- Define role-based administrative portal access rights within MaaS360
- Decommission devices by removing corporate data and MDM control

PROACTIVELY SECURE MOBILE DEVICES

MaaS360 provides dynamic, end-to-end security and compliance management capabilities to continuously monitor devices and take action

- Require passcode policies with configurable quality, length, and duration
- Enforce encryption and password visibility settings
- Set device restrictions on features, applications, iCloud, and content ratings
- Detect and restrict jailbroken and rooted devices
- Remotely locate, lock and wipe lost or stolen devices
- Selectively wipe corporate data leaving personal data intact
- Implement real-time compliance rules with automated actions
- Enable geo-fencing rules to enforce location-based compliance

STREAMLINE MOBILE DEVICE MANAGEMENT SUPPORT

MaaS360 delivers the ability to diagnose and resolve device, user or application issues in real-time from a web-based portal; offering complete IT visibility and control, and ensuring optimum mobile user productivity.

- Access device views to diagnose and resolve issues
- Locate lost or stolen devices
- Reset forgotten passcodes Send messages to devices
- Update configuration settings in real time
- Help users help themselves with a self-service portal

MONITOR AND REPORT ON MOBILE DEVICES

MI360™ dashboards deliver an interactive, graphical summary of your mobile device management operations and compliance allowing IT to report in real-time across the entire enterprise.

- Detailed hardware and software inventory reports
- Configuration and vulnerability details
- Integrated smart search capabilities across any attribute
- Customizable watch lists to track and receive alerts
- BYOD privacy settings block collection of personally identifiable information
- Mobile expense management for real-time data usage monitoring and alerting
